Latest developments of the Karma Work

It is more than two years ago we met around the theme of qualification in the karma work. Out of this meeting we could define and acknowledge our colleagues in this work and a direct result of that meeting was the start of an apprenticeship program that still goes on and where new colleagues grew. The NALM network grows.

A need that became visible at that time was to meet more often, to exchange new developments, to deepen the karma work together, to stay in contact with each other and to professionalise continuously.

We want to see the Whitsun meeting as the first one in this row and like to invite everybody in the NALM who works with the Karma. This can be as a professional, as being on the way or as student or participant in a training program.

The aim is to exchange new developments, to question our selves and to gather and work on new ideas and strategies for the future.

It would be nice to make it to a real international meeting where we inspire each other and connect to each other better in order to enhance our work and our cooperation.

Dear colleague, keep this date free and be there.
